Notes:

- Text overflows when page width shortens
- Change the orange headlines
- Too much text – paragraphs are too long
- Move the 3 elements below the first image to the top, instead of resting on the bottom
- Cut down a lot of the text in the later sections specifically
- Text color / font could be more strong
- Add more than 1 image per section
- Last section add image of a triangle course
- Rest of the photos are good
- 1 thing that might help – don't be afraid of making the sections longer then just 1 photo length
